

Cup Warmer X

Cup Warmer X

A perfect cup of coffee has to be served hot. And to ensure that as little heat as possible is lost, it is important that cups are thoroughly pre-warmed. The JURA Cup Warmer is made of top-quality materials. The cup trays are height-adjustable and made entirely of brushed stainless steel. The high-performance convection warmer has room for 75 espresso cups (diameter 60mm/2½in) or 50 coffee cups (diameter 80mm/3in), in both cases stacked and staggered. And thanks to its compact design, the modern Cup Warmer integrates perfectly into any environment.
